BRIGHT & DIMMABLE BEAM

DIMMING CAPABILITY

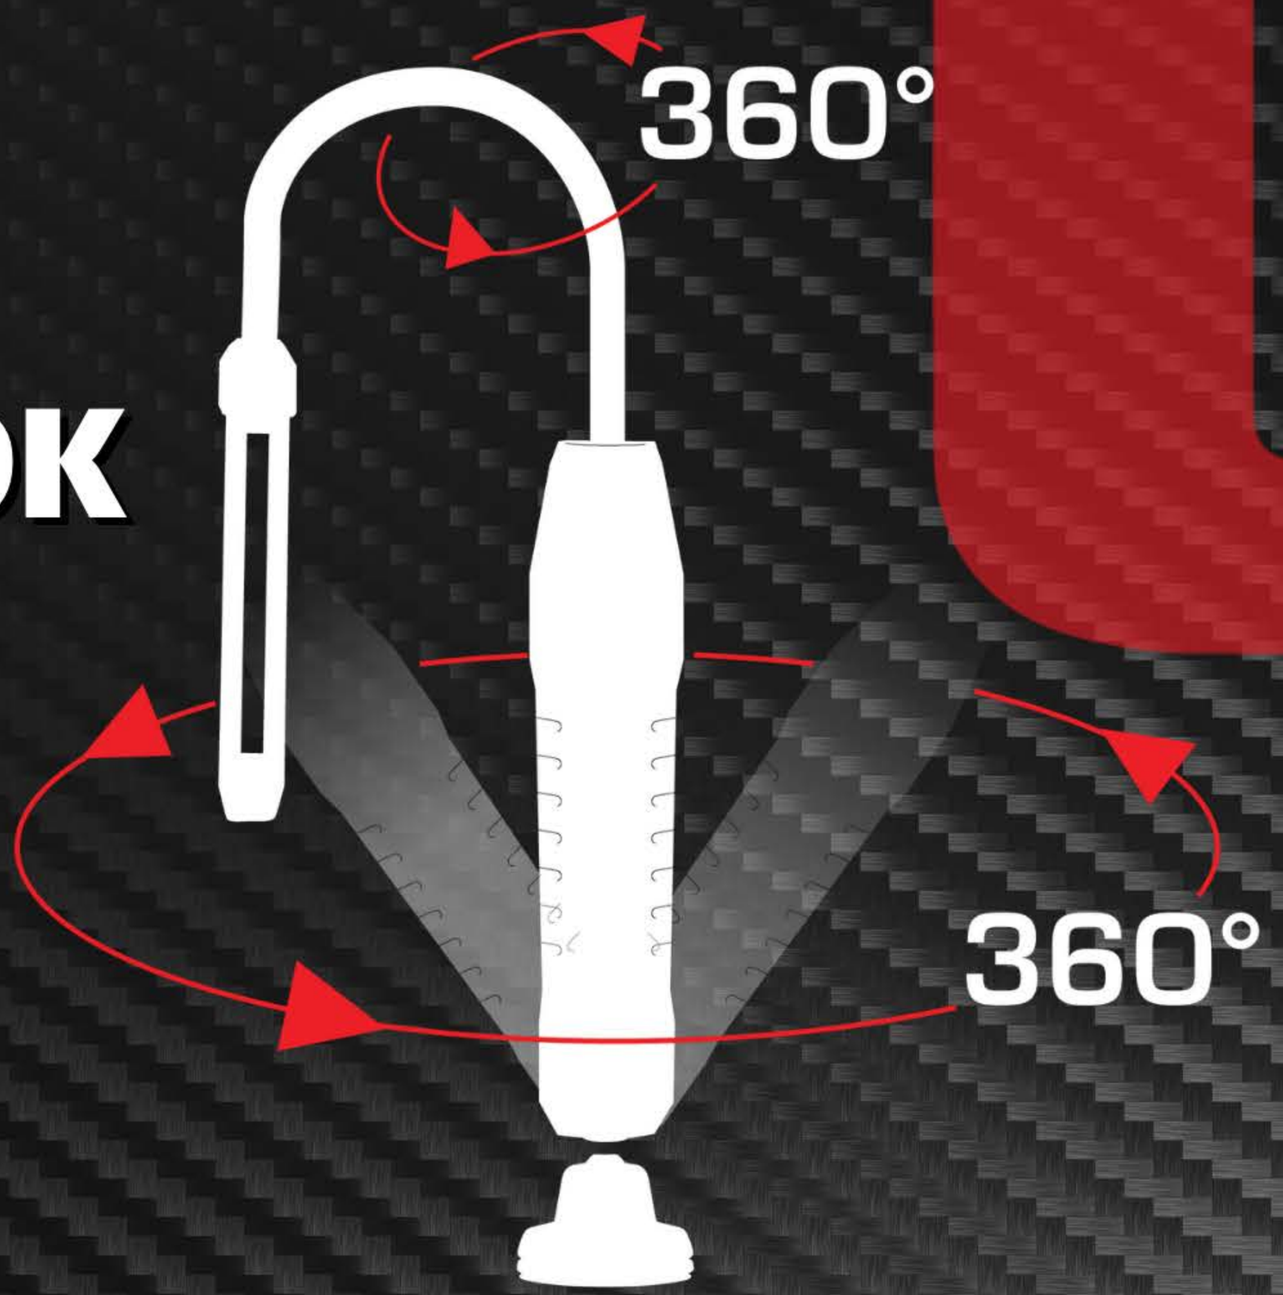

FLEXIBLE NECK

The neck of this slim work light is made of a flexible material that holds its intended position so you can easily direct the light where you need it.

360° ROTATING BASE WITH MAGNET & HOOK

The base and body of this slim inspection light are connected by a ball bearing that allows the body to rotate 360° and hold its position. The base has a magnet and hook to allow you to work hands-free

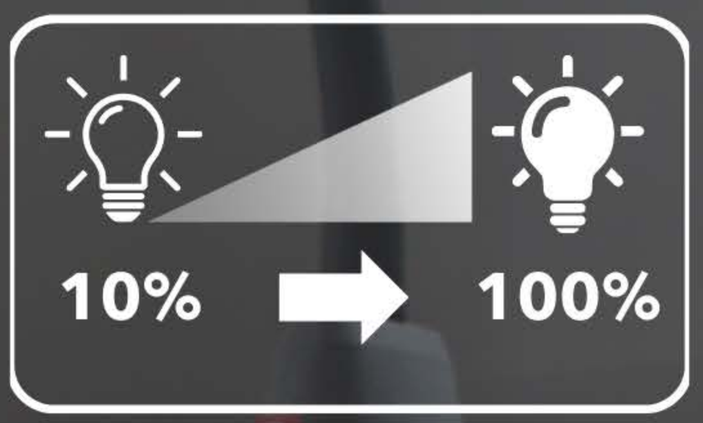

DUAL LAMPS

This slim inspection light has two lamps to adapt to your needs. The front lamp ranges from 60 - 600 lumens while the top lamp ranges from 20 - 180 lumens. Cycle through the two lamps with the power button

DIMMING FEATURE

Both lamps can adjust their brightness from 10-100% so you can have the precise illumination all for your tasks. Just turn the dial on the back while the specific light is on to activate the dimming feature.
