DESCRIPTION

Add LED accents to textile projects with Adafruit's LED Sewing Kit! Stitch a glowing circuit with conductive thread-- this kit comes with everything you need to get started:

- 1 bobbin of 2-ply conductive thread
- 2 x sewable CR2032 battery holders
- 4 x candle flicker LEDs - they twinkle automatically, no need for a microcontroller or external circuit!
- 4 x 5mm snaps to use as as sewable switches
- Needle set

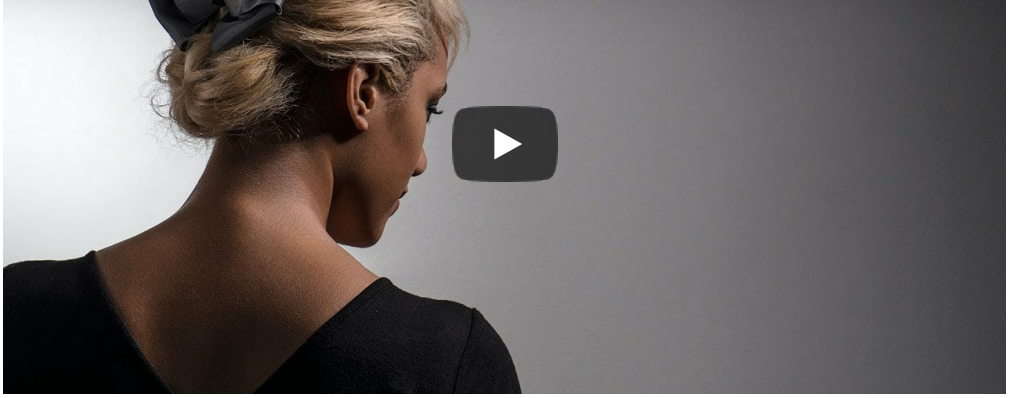

Note: As of September 30th, 2015, this product no longer comes with 2x CR2032 coin cell batteries. We recommend you purchase two coin cell batteries to use with this product.

This kit comes with enough supplies to make two projects with two LEDs each, or one project with four LEDs. Great for embroidery and needlework, light-up jewelry and hair accessories, shoes, plush toys, and more. This is a great beginner kit for kids (no soldering!) and adults alike who are looking to get into soft circuits and wearable electronics.

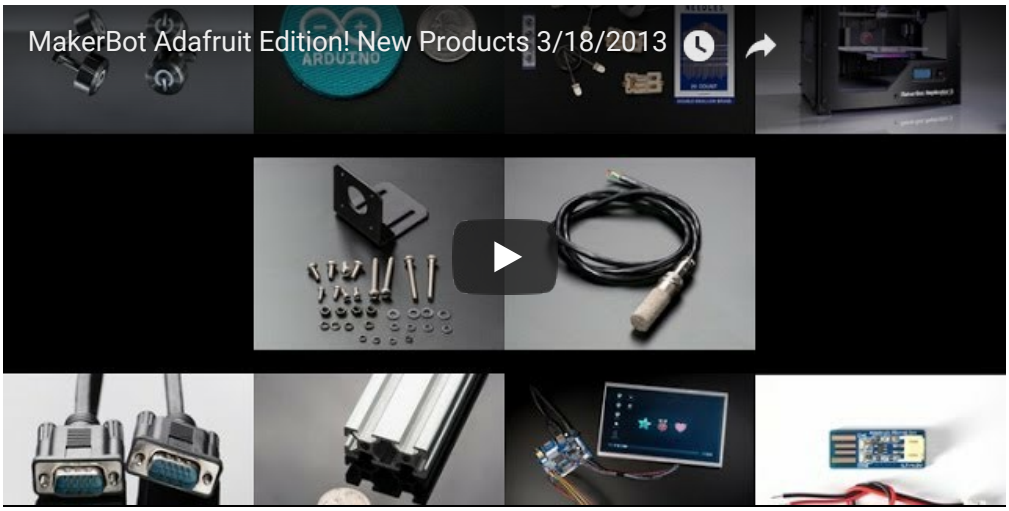

Check out our guide for the LED Sewing Kit on the Adafruit Learning System!
