Menda® - The Standard for Tools and Workbench Accessories

To Our Customers

The MENDA® brand name has been synonymous with innovation and quality since 1947. MENDA is famous for its high performance line of "dish type" liquid dispenser pumps and bottles. These pumps and bottles are now widely used in industrial electronics assembly, cleanroom, medical, and beauty applications. The MENDA brand is recognized around the world as the “standard” for finger touch liquid dispensing. People do not ask for a dispenser bottle, they ask for a MENDA bottle! However, MENDA is no longer just a dispenser pump and bottle company. The MENDA product offering now includes specialty tools such as: Circuitracers®, Soldering Aids, Cable Management, ESD Brushes, ESD Vacuums, Lotion and in this catalog we are introducing a new product offering of various Identification Holders.

In September of 2000, Desco Industries Inc. (DII), a leading manufacturer of ESD control products, acquired MENDA. Menda is now the Specialty Tools division of Desco Industries Inc.. MENDA’s strategy is to diversify into markets other than ESD. These markets include Electronics, Beauty, Fiber Optics, Medical, and many other Specialty markets. MENDA’s core product offering includes various consumable items that are needed on an end user’s workstation.

Desco Industries Inc. is proud to be an employee-owned company with an unrelenting commitment to quality, performance, and customer service. Desco Industries Inc. is well known and respected for manufacturing and has been providing quality products to the electronic assembly industry for over 20 years. In this catalog, you will find many of the standard items you have appreciated and used for years, as well as many new items to help you with more of your assembly requirements. Desco Industries Inc.’s commitment is to innovation and future technology. With Desco Industries Inc.’s leadership role in the market and its desire to continuously introduce new items, you can count on MENDA to offer many more creative and functional items in the future.

We manufacture our products in the United States of America.

We are very proud of making what we sell in our manufacturing locations in Santa Barbara and Chino, California; Marlboro and Canton, Massachusetts; Rochester, New Hampshire; Miami, Florida; and Letchworth, United Kingdom. If you are ever in these areas, we welcome the opportunity to show you around.

We sell our products primarily through local distributors. We believe that local companies with local inventory service you, our customer, the best. They also have an understanding of your local business. Our distribution base consists of a worldwide network of strategic business partners. Please see our MendaPump.com web site for a complete list of distributors in your area.

"It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity." [ESD Handbook ESD TR20.20-2008 section 2.4 Sources of Static Electricity]

Circuitracer® Voltage and Continuity Tester

- 3 Modes for Continuity and Voltage Testing:
  Mode 1: Continuity tester for unpowered circuits. 0-10 ohms, uses 35121 Lamp with two AAA batteries (not supplied).
  Mode 2: Voltage tester 60-600 volts AC or DC when 35121 Lamp is used without batteries.
  Mode 3: Voltage tester 0-60 volts AC or DC when various lamps are used without batteries.
- Illuminated lamp signals electrical circuit continuity
- High voltage lamp tests live circuitry
- Low voltage lamp tests unpowered circuitry
- Range: 0-600 volts or 1-10 ohms
- Made in America

No Toolbox is Complete Without Them

If you are looking for tools to make your life easier, consider the Menda Small Nut Starter, Hand Sleeving Cutter, Harnessing Wire Threader, brushes and more. Each tool is simple, yet highly effective in its respective design. How many times have you needed a tool that would hold that small nut just to get it started, or needed something to accurately cut small pieces of sleeving? What about a tool that would allow you to thread a wire in an already tied wire harness? These tools provide the solutions.

There is only ONE Menda Pump!

Menda's famous dish-top finger touch liquid dispensing pump and bottle.

The Menda brand is synonymous with innovation and quality since 1947. Menda is most famous for its high-performance line of "dish type" liquid dispenser pumps and bottles. These pumps and bottles are widely used in the industrial electronics assembly, cleanroom, beauty, and medical applications. Menda is recognized around the world as the "standard" for the finger touch liquid dispensing. People do no not ask for a dispensing bottle, they ask for a Menda bottle!

MENDA

Solvent Dispensers

PREVENT ACCIDENTS, WASTE
No excess fumes, no spilling, no dripping, no flash fires. Dispense no more than you want at one time. Precision, locking pump valves seal contents in bottle.

SAVE TIME
Get the amount of fluid you want in less than a second.

PREVENT FLUID CONTAMINATION
Fluid in Pure-Touch dispensing dish won't drip back into bottle to contaminate contents.

LEAVE ONE HAND FREE
No need to hold bottle.

Menda's patented* dispensers are precision instruments made in America and are ideal for dispensing solvents and other liquids. Pumps are constructed of the finest stainless steel obtainable to give a lifetime of satisfactory service. The light pressure of an applicator or sponge on the dispensing dish pumps solvent to the surface the instant you need it - perfect for cleaning with swabs, cotton balls, pads, and brushes.
