DESCRIPTION

We like capacitors so much we made a kids show about them. They're super handy and it's really helpful to have a variety lying around to pick and choose from.

This is a 10 pack of **47uF 25v** capacitors, so they can be used with any DC voltage up to 25V. They have a tolerance of ±20% and long flexible pins that make them great for perf or breadboards. Remember that electrolytic capacitors are good for low frequency filtering (~1KHz or less), for higher frequency, pair up with a ceramic capacitor

We use these capacitors in our own kits and they're great quality. They're so useful we're selling them in packs of 10. Each has nice clear labelling on the body as well in case you have a capacitor mix up.

TECHNICAL DETAILS

- Dimensions (without pins): 12mm x 5mm / 0.5" x 0.2"
- Larger pin length: 25mm / 1.0"
- Weight: 0.4 grams

RoHS

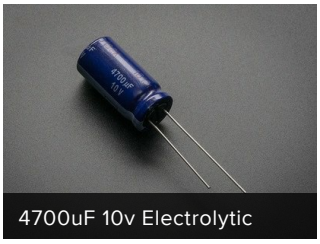

Datasheet

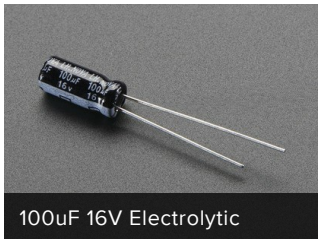

MAY WE ALSO SUGGEST...

0.1uF ceramic capacitors -

SMT/SMD 0805 Resistor

Adafruit 16-Channel 12-bit

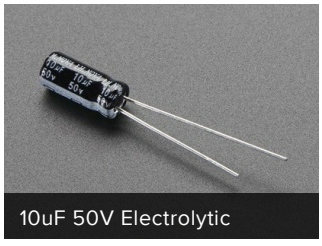

4700uF 10v Electrolytic

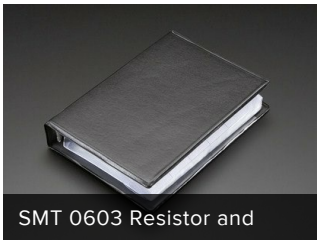

100uF 16V Electrolytic

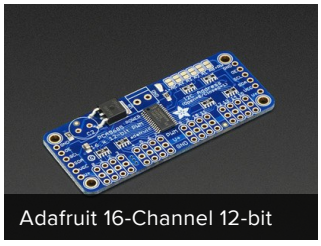

Super Capacitor - 2.5V 700

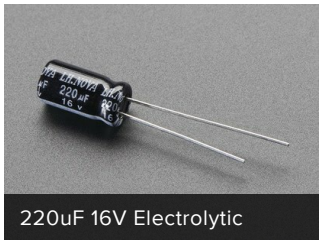

Cappy the Capacitor -

5V 10A switching power

10uF 50V Electrolytic

SMT 0603 Resistor and

Adafruit 16-Channel 12-bit

220uF 16V Electrolytic
