DESCRIPTION

Never get frustrated with 2mm-pitch modules again! Each one of these **25-pin female socket header packs** contains 5 pieces of 25-pin, **2mm** pitch headers. Great for when you need to connect to something with 2mm pitch. Stack these headers side by side or break them apart to receive your desired length. They are even gold plated to ensure longevity without oxidation. They are not break-apart but you can cut them with diagonal cutters and trim to the size you like.
